Mohaned Abdallh Musa Abdallh

GIS Specialist | Riyadh, Saudi Arabia | Phone: +966569849279 | Email : mohnedabdllh@gmail.com

LinkedIn: www.linkedin.com/in/mohaned-abdallh-6a75941ab

Portfolio: Mohaned Abdallh | GIS Portfolio

Professional Summary :

GIS Specialist with a Bachelor's Degree (Honors) in Surveying Engineering, passionate about leveraging Geographic Information Systems to develop smart, data-driven solutions. Skilled in spatial analysis, mapping, and geospatial technologies, with a strong commitment to continuous learning and innovation. Eager to contribute to impactful projects that utilize GIS across diverse sectors.. Seeking to contribute technical expertise to geospatial or land development projects.

Professional Experience :

Geographic Information Systems (GIS) Specialist

ALMANDARYAH Co. – Saudi Arabia KSA | Jul 2025- present

- Collecting and processing **environmental field data** using smart device applications and GPS technologies to support ecological and sustainability projects.
- Performing **data quality control (QC/QA)** and **coordinate standardization** before integrating data into GIS and analytical systems.
- Designing, building, and managing **spatial environmental databases** and linking them with metadata and monitoring indicators.
- Preparing **topographic, environmental, and thematic maps** using GIS software (**ArcGIS Desktop / ArcGIS Online / QGIS**) to support land-use analysis, pollution mapping, and habitat assessment.
- Conducting advanced **spatial and environmental analyses**, including **hotspot mapping, density analysis, wind speed and direction modeling, and environmental impact assessment .**
- Integrating **satellite and remote sensing data** with GIS databases for vegetation analysis, flood risk evaluation, and surface temperature monitoring.
- Developing **interactive dashboards and analytical reports** using **Power BI** integrated with GIS layers to support real-time decision-making.
- Supporting **field and operations teams** with spatial insights, route optimization, and environmental risk maps.
- Participating in **long-term environmental spatial studies** to enhance strategic planning, sustainability, and natural resource management.
- Converting and integrating CAD drawings into GIS environments **(CAD to GIS)** while ensuring accurate georeferencing and data preparation for environmental and spatial analysis**.**

Survey Engineer

Alu City Co. Ltd. – Khartoum, Sudan | Feb 2023 – Oct 2024

- Supervised installation of curtain walls per engineering specifications.
- Oversaw site leveling and elevation control using GNSS and leveling equipment.
- Coordinated measurements and angle adjustments for accurate curtain wall alignment.
- Managed workforce scheduling, task delegation, and project timeline adherence.
- Ensured compliance with safety and quality standards

Geomatics Intern Engineer
A&M Zone Co. Ltd. – Khartoum, Sudan | 2020 – 2022

- Collected field data using Total Station for point raising and site marking.
- Convert CAD files to Shapefiles after cleaning and reviewing.
- Drafted architectural and structural layouts with precision.
- Conducted land leveling and road profiling using leveling instruments.
- Measured excavation zones and calculated material quantities.
- Create a structured geodatabase to support transportation network analysis.

Education :

B.Sc. in Survey Engineering (Honors)
Sudan University of Science and Technology | 2016 – 2023

Projects :

Mosquito Control and Prevention Project, Northern Sector, Riyadh Municipality

- Collect spatial data (water bodies, cases, weather)
- Performed spatial analysis to identify waste accumulation zones and support decision-making in waste management.
- Published an interactive map to enable easy visualization and updating of spatial data.
- Support decision-making with spatial reports
- Plan control operations (spraying routes, team allocation)
- Integrate population and urban data

Interactive Waste Landfill Map Projec (ALHAMRA LANDFILL)

- Developed an interactive map using Geographic Information Systems (GIS) to visualize and manage landfill site data.
- Created spatial layers including landfill boundaries, access roads, and waste disposal areas.
- Performed spatial analysis to identify waste accumulation zones and support decision-making in waste management.
- Published an interactive map to enable easy visualization and updating of spatial data.

Sudan COVID-19 Dashboard using GIS

- Participated in the development of an interactive GIS-based dashboard to monitor COVID-19 cases across Sudan.
- Collected and organized case data in Excel sheets categorized by states.
- Used spatial analysis tools to link case data with geographic locations across Sudanese states.
- Developed and published the dashboard platform to visualize real-time case distributions and trends for public and institutional use.

Network Analysis of Khartoum Public Transportation using GIS

- Conducted a comprehensive GIS-based network analysis of Khartoum's public transportation system.
- Digitized and mapped the transportation network using ArcGIS.
- Built and corrected network topology for accurate route modeling.
- Applied Network Analyst tools to evaluate connectivity, route optimization, and service coverage.

Technical Skills :

- GIS Software: ArcGIS, QGIS, ArcGIS Pro, ArcGIS Online
- ArcGIS Collector / Survey123
- Model Builder FME
- Power BI , Tableau , Looker studio
- Google My Maps
- Mobile data collection apps

- Blender (3D modeling, GIS visualization)
- Surveying Tools: Total Station, GNSS Receiver, Auto Level
- CAD & Design Tools: AutoCAD, Civil 3D, Surfer, Google Earth
- Google sheets , google slides
- Office Tools: Microsoft Word, Excel, PowerPoint(daily report)
- Spatial Analysis, Map Creation, Data Collection, Data Quality control (QC),Data Quality Assurance (QA)
- Web technologies : HTML , JavaScript basic

Soft Skills :

- Strong analytical thinker with a knack for identifying patterns and insights.
- Highly adaptable to new technologies and changing business environments.
- Teamwork and Leadership abilities.
- attention to detail.
- environmental data visualization
- Problem-solving
- Fast learning ad teaching

Certifications & Courses :

- GIS, Mapping, and Spatial Analysis – **University of Toronto | Dec 2024**
- Going Places with Spatial Analysis **– Esri MOOC | Feb 2025**
- Cartography **– Esri MOOC | Feb 2025**
-

Languages :

- Arabic: Native
- English: Intermediate (B2)

Availability :

Ready to relocate or work remotely. Open to full-time or contract opportunities in GIS, land surveying, Geomatics and geospatial analysis.
